

## **STRADDLING TYPE OF VEHICLE**

### **ABSTRACT OF THE DISCLOSURE**

A straddle type vehicle comprises a fuel tank with a built-in fuel pump. The fuel pump is placed in the fuel tank with the pump axis directed generally transversely relative to a vehicle width direction. A generally horizontal surface portion is formed on a portion of a bottom of the fuel tank and the fuel pump is placed on the generally horizontal surface portion with the pump axis extending generally horizontally.
